

MERN Stack Development – Module 1 Exercise

Hands-on Exercise No. 1

Course: MERN Stack Development

Module: Introduction to MERN Stack

Total Marks: 10

Due Date: 10/05/2026

Instructions:

- Prepare your solution in MS Word
 - Submit in .doc or .docx format
 - Late or copied submissions will not be accepted
-

Learning Outcome:

- Understand MERN stack architecture
 - Learn how frontend and backend connect
 - Set up development environment
 - Build a basic full-stack app
-

Problem Statement:

You are assigned as a junior developer to set up a MERN stack environment and create a simple application that displays data from the backend to the frontend.

Task Requirements:

- Install Node.js and npm
 - Set up a basic Express server
 - Create a MongoDB database and insert sample data
 - Build a simple React application
 - Connect React with backend API
 - Display data on browser
-

Submission Guidelines:

- Upload a .docx file on LMS
- Include screenshots of :
 - Node server running
 - MongoDB connection
 - API response
 - React output
- Add short explanation for each step
