

Node.js & Express Bootcamp – Module 2 Exercise

Hands-on Exercise No. 2

Course: Node.js & Express Bootcamp

Module: Express APIs

Total Marks: 10

Due Date: 24/05/2026

Instructions:

- Prepare your solution in MS Word
 - Submit in .doc or .docx format
 - Late or copied submissions will not be accepted
-

Learning Outcome:

- Build RESTful APIs using Express
 - Implement CRUD operations
 - Use middleware for validation
 - Handle JSON data in APIs
-

Problem Statement:

You are working as a Backend Developer for a Library Management System. The client requires an API to manage books efficiently, including adding, updating, deleting, and fetching book records.

Task Requirements:

- Create a new Express project
- Implement the following routes:
 - GET /books → Fetch all books
 - POST /books → Add a new book
 - PUT /books/:id → Update book details
 - DELETE /books/:id → Remove a book
- Add middleware to validate request data
 - Example: book title must not be empty
- Use express.json() for handling JSON input and output

- Test API using Postman
 - Take screenshots of:
 - API requests
 - API responses
 - Successful CRUD operations
-

Submission Guidelines:

- Upload your .docx file on LMS
- Include:
 - Code snippets
 - Postman screenshots
 - Output explanations
- Add short description for each API endpoint
