

Advanced React Masterclass – Module 1 Exercise

Hands-on Exercise No. 1

Course: Advanced React Masterclass

Module: React Fundamentals

Total Marks: 10

Due Date: 12/05/2026

Instructions:

- Prepare your solution in MS Word
 - Submit in .doc or .docx format
 - Late or copied submissions will not be accepted
-

Learning Outcome:

- Understand JSX and its role in React
 - Create functional components and use props
 - Manage state in React applications
 - Handle user events effectively
-

Problem Statement:

You are working as a Frontend Developer for a startup building a task management application. The client needs a simple prototype to demonstrate core React concepts.

Task Requirements:

- Create a new React project using create-react-app
- Build a Todo List component with the following features:
 - Add new tasks
 - Display tasks in a list
 - Mark tasks as completed
- Use props to pass data between components
- Use state to manage the list of tasks
- Implement event handling for adding and completing tasks

- Take screenshots of:
 - Component code
 - Browser output showing tasks added and completed
-

Submission Guidelines:

- Upload your .docx file on LMS
- Include:
 - Code snippets
 - Screenshots of working app
 - Output results
- Add short explanations for each feature
