

Advanced React Masterclass – Module 4 Exercise

Hands-on Exercise No. 4

Course: Advanced React Masterclass

Module: Scalable Architecture

Total Marks: 10

Due Date: 18/05/2026

Instructions:

- Prepare your solution in MS Word
 - Submit in .doc or .docx format
 - Late or copied submissions will not be accepted
-

Learning Outcome:

- Organize React projects using scalable folder structure
 - Build reusable components for better development
 - Implement Redux for global state management
 - Apply best practices for large applications
-

Problem Statement:

You are working as a Frontend Architect for a SaaS platform. The client wants a scalable React application that can grow without becoming difficult to manage. Your task is to design a clean structure, reusable components, and implement state management.

Task Requirements:

- Create a new React project with the following folder structure:
 - /components
 - /pages
 - /redux
 - /services
 - /assets
- Build at least 3 reusable components:
 - Button
 - Card
 - Modal

- Implement Redux for global state management
 - Example: user authentication state
 - Create a sample page using reusable components and Redux
 - Apply best practices:
 - Modular code structure
 - Separation of concerns
 - Clean naming conventions
 - Take screenshots of:
 - Folder structure
 - Reusable component code
 - Redux setup
 - Browser output
-

Submission Guidelines:

- Upload your .docx file on LMS
- Include:
 - Folder structure screenshots
 - Code snippets
 - Output screens
- Add short explanations for each section
