

Module 1 – Design Principles

1. Intro to UI/UX

What is UI/UX?

UI (User Interface) is the visual design of a product.
UX (User Experience) is how a user interacts and feels while using it.

Difference Between UI and UX

- UI focuses on look and design
- UX focuses on experience and usability

Key Goal

Create user-friendly, attractive, and easy-to-use digital products

2. Color Theory

What is Color Theory?

Color theory is the study of how colors interact and how they influence user emotions and behavior.

Why Colors Matter

- Improve user attention
- Create emotional impact
- Enhance brand identity

Basic Concepts

- Primary colors
 - Secondary colors
 - Color harmony
 - Contrast
-

3. Typography Basics

What is Typography?

Typography is the art of arranging text to make it readable and visually appealing.

Why Typography Matters

- Improves readability
- Builds visual hierarchy
- Enhances user experience

Key Elements

- Font style
 - Font size
 - Line spacing
 - Letter spacing
-

4. Visual Hierarchy

What is Visual Hierarchy?

Visual hierarchy is the arrangement of elements in a way that shows their importance.

How It Works

- Important elements appear first
- Size and color guide attention
- Placement affects focus

Example Principles

- Headings are larger
 - Buttons are highlighted
 - Important content stands out
-

5. Spacing & Layout

What is Spacing?

Spacing is the distance between elements in a design.

What is Layout?

Layout is the structure used to organize content on a screen.

Why They Matter

- Improve readability
- Create clean design
- Reduce clutter

Key Concepts

- Padding
 - Margin
 - Grid system
 - Alignment
-

6. Key Concepts to Remember

- UI is visual design, UX is user experience
 - Colors affect emotions and branding
 - Typography improves readability
 - Visual hierarchy guides user attention
 - Spacing creates clean and structured design
-

7. Summary

Design principles form the foundation of UI/UX design. Understanding color theory, typography, visual hierarchy, and layout helps create user-friendly and visually appealing digital experiences.
